Professional Summary

Backend and Full-Stack Developer with 1 year of professional experience building backend applications using **Java, Spring Boot, Go, Node.js and Express.js**. Experienced in developing **REST APIs, authentication and authorization, database-driven applications, backend debugging and production issue resolution**. Strong foundation in **Go programming, concurrency, goroutines, channels, interfaces and error handling**, alongside professional experience developing **Java and Spring Boot** services for a cloud-based **core banking** platform used by financial institutions in the Nordic region. Experienced with **PostgreSQL, MySQL, MongoDB, Docker, Git, JavaScript and React.js**. Strong interest in **Generative AI, Agentic AI and LLM applications**.

Technical Skills

Languages: Go (Golang), Java, Python, JavaScript, SQL, HTML, CSS

Backend: Go, Node.js, Express.js, Spring Boot, REST APIs, HTTP Services, JSON, Microservices, Backend Architecture, Middleware

Go: Goroutines, Channels, Concurrency, Interfaces, Error Handling, HTTP Servers, Gin

Java: Core Java, OOP, Collections Framework, Exception Handling, Multithreading, Data Structures & Algorithms, Design Patterns

Frameworks: Spring Boot, Spring Data JPA, Hibernate, Spring Security, Express.js, Gin, React.js, JWT, Okta

Databases: PostgreSQL, MySQL, MongoDB, SQL Query Writing & Optimization, Relational Schema Design

AI & Emerging Technologies: Generative AI, Agentic AI, LLM Applications, AI Agents, Prompt Engineering

Tools & Practices: Git, Postman, Docker, Linux, Playwright, Agile/Scrum, Code Reviews, SDLC, Unit & Regression Testing

Experience

Aura Cloud Jul 2025 – Present
Software Engineer Bangalore, India

- Develop and maintain **Java and Spring Boot** backend services for a cloud-based core banking platform.
- Build and enhance **REST APIs** for customer onboarding using clean, scalable and maintainable backend code.
- Implement authentication and authorization using **Spring Security, JWT and Okta**.
- Debug production issues through log analysis, API troubleshooting and root cause analysis.
- Automate regression testing using **Playwright** and implement GTM/GA4 event tracking.
- Collaborate with QA, frontend and business teams in **Agile/Scrum** delivery.

Webknot Technologies Mar 2025 – May 2025
Backend Developer Intern Bangalore, India

- Developed backend modules using **Java, Spring Boot, Spring Data JPA, Hibernate** and REST APIs.
- Worked with **MySQL and PostgreSQL** for database development and SQL query optimization.
- Developed and integrated backend APIs using **Node.js and Express.js** for application features and services.
- Debugged API and business logic issues through request tracing and application log analysis.
- Collaborated with frontend and QA teams to resolve defects and improve application stability.

Projects

Employee Management Platform 2024

Java, Spring Boot, Spring Security, PostgreSQL

- Built a layered backend using **Java and Spring Boot** with RESTful APIs and CRUD operations for employee management.
- Implemented **JWT authentication and role-based authorization** using Spring Security.
- Designed relational database schemas using **Spring Data JPA and Hibernate**.
- Implemented validation, exception handling and optimized SQL queries for reliable backend operations.

Node.js Employee Management API 2025

Node.js, Express.js, MongoDB, JWT, REST APIs

- Built a RESTful backend using **Node.js and Express.js** for employee and user management.
- Implemented **JWT-based authentication and role-based authorization** using reusable Express middleware.
- Designed MongoDB schemas and implemented CRUD operations with validation and structured error handling.
- Developed centralized middleware for authentication, request validation and error handling.

Go Microservices & Employee Management Platform 2026

Go, Gin, PostgreSQL, Docker, REST APIs

- Built a production-style backend using **Go and Gin** with RESTful APIs for employee management.
- Implemented concurrent request handling using **goroutines, channels and Go interfaces**.
- Designed PostgreSQL schemas and implemented CRUD operations with structured error handling.
- Containerized the application using **Docker** and followed modular, microservice-oriented architecture.

Education

KIIT University 2021 – 2025
Bachelor of Technology (B.Tech) in Computer Science Bhubaneswar, Odisha
