

Abhishek Anand

Bangalore, India

9650734826 — anand.abhishek9650734826@gmail.com — LinkedIn GitHub

Professional Summary

Backend-focused **Node.js Developer with 1+ year of experience** building RESTful APIs using **Node.js, Express.js, and MongoDB**. Experience with **React and Next.js** for frontend integration. Strong understanding of API design, authentication, database modeling, debugging, and end-to-end MERN stack development.

Education

KIIT University

2021 – 2025

B.Tech in Computer Science

Bhubaneswar, Odisha

Experience

AuraCloud

Aug 2025 – Aug 2026

Software Engineer

Bangalore, India

- Developed and maintained backend services and RESTful APIs using **Node.js and Express.js**.
- Designed database models and queries using **MongoDB**.
- Implemented authentication, authorization, and secure API access using **JWT and RBAC**.
- Integrated backend APIs with frontend applications built using **React and Next.js**.
- Worked on API validation, pagination, filtering, error handling, and performance improvements.
- Investigated and resolved production issues and bugs reported by QA and users.
- Collaborated with cross-functional teams using Git and Agile development practices.

Webnot Technologies

Apr 2025 – Jul 2025

Software Engineer Intern

Bangalore, India

- Developed RESTful APIs using **Node.js and Express.js**.
- Designed MongoDB schemas and implemented CRUD operations using Mongoose.
- Implemented authentication and authorization using JWT and role-based access control.
- Integrated backend APIs with **React** frontend components.
- Worked on API validation, pagination, filtering, and error handling.
- Assisted in debugging application issues and fixing QA-reported bugs.

Key Projects

Employee Management Web Application

2024

Node.js, Express.js, MongoDB, React

- Built backend APIs for managing employees, roles, and departments.
- Implemented JWT-based login and protected routes.
- Connected REST APIs with React frontend for data rendering and form handling.
- Optimized MongoDB queries and indexes for better performance.

E-commerce Platform (Learning Project)

2023

Node.js, Express.js, MongoDB, Next.js

- Developed APIs for products, users, carts, and orders.
- Implemented server-side rendering using Next.js for SEO-friendly pages.
- Integrated payment workflow using mock gateways and webhook handling.

Technical Skills

Languages: JavaScript, TypeScript, Java, C++

Backend: Node.js, Express.js, REST APIs, JWT Authentication

Frontend: React.js, Next.js, HTML, CSS

Databases: MongoDB, PostgreSQL (basic)

Tools: Git, Postman, Docker, Linux, VS Code
